
Overview

Saint Luke's Regional Medical Center's (SLRMC) reference laboratory is a full-service laboratory with competitively priced tests, proven high quality, and exceptional turnaround times. Because we are affiliated with Iowa Health System, we can offer you access to the most modern technology and methods available.

Our staff of Board-certified pathologists and technologists provide the most dependable diagnostic information available. Our service is accredited by the American College of Pathologists (CAP)-1764101, Centers for Medicare & Medicaid Services (CMS), Clinical Laboratory Improvement Amendments (CLIA)-16D0385289, AABB (formerly the American Association of Blood Banks), and DNV.

Our portfolio of tests includes routine as well as esoteric testing, and our reporting capabilities are rapid and accurate. With a dedication and commitment to serving your clinical reference laboratory needs every day, SLRMC reference laboratory offers the tests listed in this catalog and more.

Service Philosophy

SLRMC is committed to a standard of excellence in all areas of patient care. We are dedicated to providing superior service to patients, families, physicians, visitors, hospital guests, and fellow workers. All will be served with courtesy, respect, and compassion which communicates a desire to meet another's need with a personal, efficient, and caring approach.
